1. All pending claims 1-14 are allowed. Claim 1 is independent.

2. The following is an examiner's statement of reasons for allowance:

The claims have been amended to overcome the objection set forth in the previous Office Action dated January 30, 2006. The reasons for allowance for claims 1-14 are still valid after the updated search. The reasons are repeated below.

Claim 1 is allowable over the prior art of record. The closest prior art Petruchik et al. (U.S. Patent No. 6,386,711) discloses a digital projector with a scanner, the projector comprising the scanner (12), microprocessor (16), and a document image memory (18), the microprocessor 916) connected to the scanner (12) and image memory (18).

Petruchik et al. does not disclose a signal processing and control unit, a video buffer, an output unit and a CPU as claimed, the signal processing and control unit for receiving and processing a first scanned image from the document scanning module to obtain a second scanned image to be stored in a memory, the video buffer for receiving the second scanned image, the output unit for receiving and processing the second scanned image from the video buffer and sending a third scanned image to the projector, and the CPU for controlling the signal processing and control unit, the memory, and the output unit. Note that Petruchik et al. discloses the microprocessor 916), not a combination of a signal processing and control unit, a video buffer and a CPU as claimed.

Claims 2-14 depend on claim 1. Claims 2-14 are allowable for the reason given for claim 1.

Art Unit: 2627

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
